RotoSpa

The latest in portable
spa technology

The DuoSpa

The DuoSpa from RotoSpa is a stylish, affordable, 2-3 person performance spa, that breaks the mould with design features to fit into your lifestyle perfectly.

Due to the unique way it's created, it's light enough for one to two people to handle, tough enough to resist damage when moved, therapeutic, low maintenance and affordable for many more people. Its compact design, smooth finish and flowing lines ensures it will fit into and complement just about any space, or even balcony. With the demands of modern living you deserve the ultimate in home relaxation and recreation. **You deserve the DuoSpa.**

Pleasing points of perfection

- Unique design with aesthetically pleasing flowing lines.
- A superb finish, far in excess of any spa in its price range.
- The DuoSpa boasts two full depth naturally reclining positions and benefits from a world class hydrotherapy system.
- An advanced manufacturing process means it's formed in one durable, lightweight piece.
- The DuoSpa has increased strength with unparalleled heat and noise insulation.
- Extremely lightweight, weighing in at approximately 90kg so it can be easily moved, lifted or slid into place by 1 - 2 people.
- Designed to fit through a standard sized door and because it's so light there is no need for cranes etc when delivered.

Relaxing, Revitalising, Rewarding. RotoSpa.

Revel in a world of relaxation and recreation!

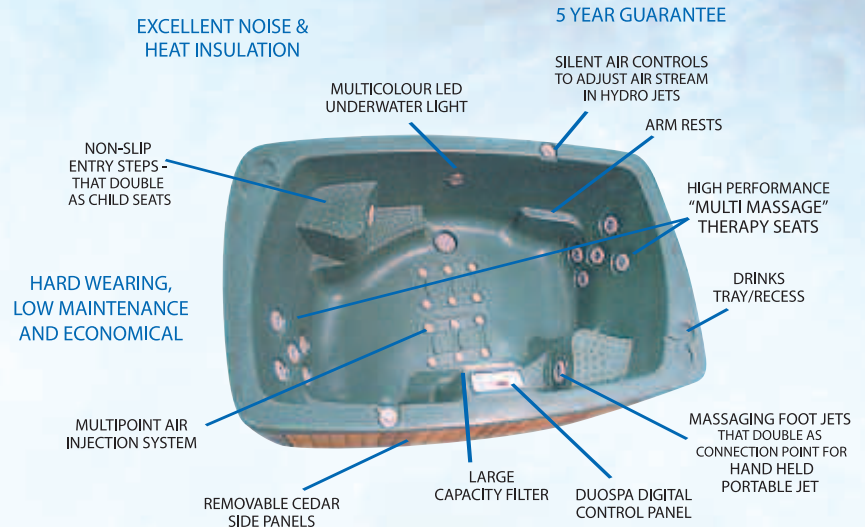

The DuoSpa promotes well-being and a lifetime of relaxation. Stress and strain of hectic modern lifestyles cause tiredness, headaches and muscular tension. Bathing in warm water and the hydrotherapy action of the DuoSpa causes blood vessels to dilate, improving circulation, cardiac output and the purification of toxins. Immersion in bubbling water and the buoyancy reduces body weight by 90%, taking the pressure off tired and aching muscles and joints. This improves mobility and helps relieve some symptoms of rheumatism and arthritis. Massage jets aid in reducing 'stress' hormones, such as noradrenalin helping you to forget the stresses of the day, restoring a feeling of tranquil well-being and encouraging a restful night's sleep.

Complement your life and living space

This attractive, compact and affordable 2-3 person spa, is easy to move and maintain, and will complement your garden or balcony. We use RIM technology along with Australian design expertise to create a unique UK manufactured product with a specification second to none. Spa set up has never been easier and economical running costs mean you can enjoy your DuoSpa any time – simply whisk the cover off and immerse yourself in water temperatures of up to 40°C – a fantastic feeling after a long day, particularly in winter months.

Powerful performance

The DuoSpa has a high flow manifold distribution system that delivers water to each jet at uniform pressures, rather than a single pipe linked from jet to jet. Combinations of the latest adjustable therapeutic, rotating massage jets in differing sizes have been strategically positioned to give various massage effects. Alternative systems include neck and shoulder combinations with lower, middle and upper back, plus leg and foot massage. An optional hand held 'multi massage' jet can also be fitted to direct a powerful hydrotherapy jet to any area of the body. The turbo air injection system adds millions of tiny air bubbles into the water around your body, legs and even under your feet for a more invigorating massage experience.

Having developed a truly unique and innovative spa, it is only fitting that we should supply the very best in spa systems. We have tried and tested many spa systems to ensure optimum performance and reliability at the right price.

Built to last. Engineered to perform. Superb Specification:

DuoSpa S160 Digital:

Size	1820 x 1210 x 700mm Deep - Fits through standard doorway!
